

Shah Md. Arafatul Rahman

● AVAILABLE FOR HIRE (REMOTE)

Senior Laravel & Backend Engineer · ~5 Years Production Experience

■ Dhaka, Bangladesh (UTC+6) · ✉ arafatul985@gmail.com · ☎ +880 1738020985 · 🌐 gitlab.com/Arafatul_Rahman · 🌐 linkedin.com/in/shah-md-arafatul-rahman

Executive Summary: High-impact Backend Engineer with ~5 years of experience architecting resilient, production-grade applications using **Laravel, PHP 8, MySQL/PostgreSQL, and Redis**. Proven track record building enterprise shift scheduling systems with timezone engines for European workforces, high-traffic national portals (5,000+ daily searches), and Dockerized CI/CD cloud environments. Actively building **AI Agents (LangChain, OpenAI API)** and automated workflow pipelines (**n8n**).

WORK EXPERIENCE

Laravel Developer · Dingi Dev (Remote)

Stack: Laravel 10/11 · Vue.js · Livewire · Redis Queues · Docker · Linux VPS

- Architected distributed **shift-wise scheduling system** for European enterprise workforce with multi-country timezone support.
- Developed computation engines for **leave entitlement, vacation accrual, overtime pay**, and compensation according to European labor standards.
- Engineered background worker architecture with **Redis queues** for automated SMS/email reminders and calendar syncs.
- Configured and maintained containerized environments with **Docker Compose** and Nginx reverse-proxies on Linux cloud instances.

Full Stack Developer · Innovation Info System

Stack: Laravel · MySQL · REST APIs · Invoicing · Stock Tracking

- Built enterprise **POS and Inventory System** from scratch for Australian client (Banglatussie) managing catalog and orders.
- Engineered automated stock deduction, invoice generation, barcode scanning, and multi-warehouse product reconciliation.
- Designed normalized MySQL schema structures, indexes, and optimized heavy analytical sales reporting queries.
- Co-developed interactive online learning platform features with quiz evaluation engines and student progress dashboards.

Software Developer · BdTender (Part-Time)

- Built dynamic search & filter engine using **Laravel & Ajax** for Bangladesh's premier tender aggregation portal.
- Implemented real-time notification dispatchers for government and private e-GP tenders across 64 districts.

KEY ARCHITECTURAL PROJECTS

- BdTender Procurement Portal:** National tender aggregation platform serving thousands of daily commercial users with sub-second Ajax search indexing and real-time SMS/email alerts.
- Enterprise Shift Management Engine:** Complex multi-tenant workforce scheduling system with custom timezone handlers, holiday rules, and compensation calculator.
- AI-Powered Workflow Automations:** Built intelligent lead scoring & RAG document parsing bots integrating **LangChain, OpenAI API**, and **n8n** into Laravel backends.

TECHNICAL ARSENAL

2022 — Present BACKEND

Laravel 10/11, PHP 8.x, REST APIs, Sanctum, Passport, Queues, Horizon, Events, Jobs.

DATABASES

MySQL, PostgreSQL, **Redis Caching**, Schema Optimization, Indexing.

DEVOPS & CLOUD

Docker & Compose, GitHub Actions, GitLab CI, AWS (EC2, S3), Nginx, Linux VPS.

AI & AUTOMATION

AI Agents, LangChain, OpenAI, **n8n Workflows**, RAG, Vector Search.

FRONTEND & TOOLS

Vue.js, Livewire, JavaScript / Ajax, Tailwind CSS, Postman, Git.

CREDENTIALS & CERTS

AWS Cloud Practitioner

Amazon Web Services (In Progress)

PHP & Laravel — Advanced

Udemy · Completed 2022

AI Agents & LangChain

DeepLearning.AI · Completed 2025

EDUCATION

B.Sc. in Computer Science & Engineering

Dhaka, Bangladesh

Algorithms, Data Structures, Database Architecture, OOP.

LANGUAGES & STYLE

- English:** Fluent (Professional working)
- Bengali:** Native
- Async-first & clean documentation
- Timezone flexible for EU / US overlap
